Software and Systems Engineer with five years of experience in web and mobile development, backend and blockchain development, AI, and embedded systems. My work includes building applications, developing software for hardware devices, and conducting technical research. I have published research papers in AI and blockchain.

¶ EXPERIENCE

PROFESSIONAL EXPERIENCE

March 2026 to April 2026

Backend Engineer

Timbuktu Kakuna

- Worked on backend development for the organization.
- Maintained backend services across multiple environments.

June 2025 to August 2025

Senior Software Engineer

MatchChayn

- Contributed to the design of the system architecture.
- Developed backend and frontend components for the web platform.

SELECTED PROJECTS

August 2025 to Present

Blockchain Engineering

Zypp Pay

Offline-capable payments using Stablecoins on Solana.

- Built offline transaction creation and signing.
- Lead Engineering across different payment protocols.

November 2026 to Present

AI & Hardware Engineering

Decibel Silicon

Low-power AI Processor for Hearing Aids.

- Converted a Python noise reduction algorithm into fixed-point firmware.
- Contributed to RISC-V processor design.
- Worked on a design targeting 5–15 mW power consumption.

jooosh

¶ SELECTED PROJECTS (CONTINUED)

September 2026

AI & Software Engineering

Openrep

Platform-Agnostic Reputation Layer for AI Agents.

- Implemented signed attestations for recording and verifying agent activity.
- Developed the OpenRep SDK (v0.1.3) and CLI (v0.1.4).
- Built tools for issuing and verifying reputation records.

March 2026
to May 2026

AI, Security, Hardware & Software Engineering

Rail

Hardware Security & Monitoring System.

- Built the backend monitoring system.
- Programmed smartwatch firmware in C and C#.
- Developed a dashboard with device location mapping.

¶ RESEARCH AND PUBLICATIONS

October 2026

Use of Inference of Artificial Intelligence

Published a *research paper* and *formula* on the application of inference in artificial intelligence.

March 2026

Delay Tolerant Networking and Solana Transaction Propagation for Offline-First Payments

Research on transaction propagation and network reliability for offline Solana payments.

¶ AWARDS AND RECOGNITION

2025

NASA SPACE APPS HACKATHON

2nd Position

Benin City, Edo State.
